

Cosmet'in Lyon and Skinobs were glad to welcome R&D, evaluation managers, consultants and Business Developer from testing labs, instrumentation manufacturers during this symposium. This symposium aimed to enable cosmetics from all over the world to make a technological and scientific point through academic and applied lectures and interact with attendees, meet testing partners, exhibitors, CROs or instrumentation manufacturers, participate in demonstrations of devices carried out by exhibitors. During two days, conferences and short talks took place into 6 sessions:

## PRECLINICAL DAY

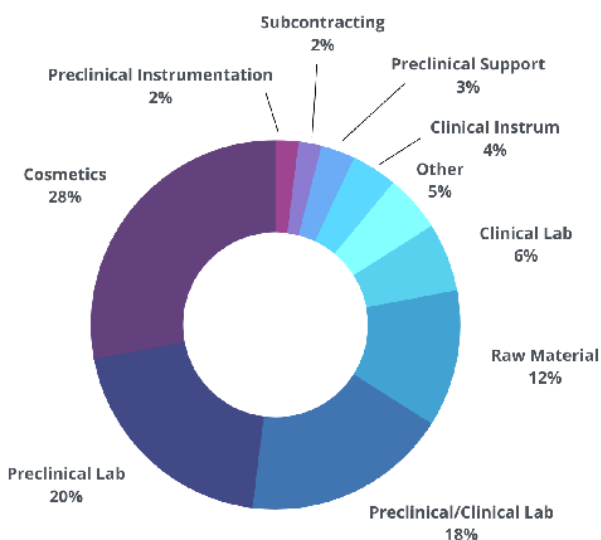

- 1st Session: Pollution – Inflammation – Allergies
- 2nd Session: Sun and Pigmentation
- 3rd Session: Test of the Content-Contentair Interaction

## CLINICAL DAY

- 1st Session: Barrier Function of the Skin
- 2nd Session: Gloss and Radiance of skin and hair
- 3rd Session: Sensitive Skin

“Cosmetotest was quite good for a first time! This is a small event but very focused and very qualitative with the right audience. We had good leads and that was also good to discuss with the right people.”

Guido Mariotto  
Miravex

“The Cosmetotest event has been a very successful event. You go to an event to learn something, to meet people and to have business interactions. I think all these things have been made possible at the Cosmetotest. The Cosmetotest has been a successful event for RiverD [...] My compliments to the organizers and I am looking forward to the next edition.”

“ The first edition of this congress dedicated to the dermo-cosmetic was very interesting and attractive about the quality of presentations and information spended, both in-vivo and in-vitro with a pragmatic approach. A renewed experience for the next edition!

Jean-Christophe Pittet  
Orion Concept

“ Cosmetotest is a subtle mix of science and technology that brings scientists closer together and industrialists driven to develop the cosmetics of tomorrow. All have the same sensitivity. The «focus» format is totally adapted and shows singularity. The Talks are punctuated by convivial moments.

Fabrice Monti  
Microfactory
