

PROVISIONAL PROGRAM

Wednesday 14th May

Pigmentation

Exploring the efficacy of dermocosmetic products in addressing hyperpigmentation in subjects with higher phototypes: multicentric studies

Elodie PRESTAT-MARQUIS | Naos

In Vivo Characterization of Facial and Hand Hyperpigmentation Spots: Surface and Depth Insights

Aline RIGAL-DACHAUD | Clarins

Influence of ingredients on foundation wear using an in vitro instrumental method

Aurélie BANCO | Co-Lab-Ora

Microbiom

Assessment of the deleterious effect of an air pollutant, nitrogen dioxide, on the cutaneous microbiota

Marc FEUILLOLEY | Université de Caen

Corynebacterium cassirii, a newly discovered skin commensal with anti-aging properties

Valérie CENIZO | L'Occitane

Thursday 15th May

Skin vascularization

Regulation pathways of cutaneous microcirculation: effect of ageing

Béregère FROMY | LBTI

Evaluating angiogenesis in cosmetics using the chicken CAM assay

Chloé PRUNIER | Inovotion

[Exposome & Pollution](#)

Quantitative assessment of mitochondrial morphology for evaluation of skin cell health in exposome and claim substantiation studies

Abdel AOUACHERIA | CNRS Montpellier

A 3D immunocompetent human skin model as a platform for efficacy testing

Marie-Li CANAL | Evonik

Connected camera for epi-aging and anti-aging cosmetics: an innovative at-home study on monozygotic twins

Thomas NAPPEZ | Connected Physics

Microbiopsies as an innovative tool to unlock new insights within standard clinical studies

Stewart LONG | Cutest

Want to be an exhibitor at Cosmetotest 2025 ?

Exhibitors: Byome Labs | Canfield | Cortex | Dermaclaim | Dr Goya | Eurofins Cosmetics & Personal Care | Eotech | GenEvolution | Inovapotek | Microfactory | Miravex | Novitom | OxiProteomics | PhD Trials | Pixience | PKERM | Scibase | SGS Proderm | Zurko Research
